

FAQ

- [What material is used for the products?](#)
- [Have you dyno tested the Carb spacers with "Dimple Technology"?](#)

What material is used for the products?

The products are made using advanced polymers specifically designed for the additive manufacturing process.

Have you dyno tested the Carb spacers with "Dimple Technology"?

Yes we have dyno tested the Dimple Technology. Watch the YouTube video [here](#). Also have a look at the Carb Spacer Product pages for [4500](#) and [4150](#) series spacers for more details.
